QUEZON CITY UNIVERSITY

SAN BARTOLOME | SAN FRANCISCO | BATASAN HILLS

COLLEGE OF COMPUTER STUDIES
INFORMATION TECHNOLOGY DEPARTMENT

COURSE SYLLABUS

COURSE TITLE	INTRODUCTION TO HUMAN-COMPUTER INTERACTION
COURSE CODE	HCI101
CREDIT UNITS	3
COURSE PREREQUISITE	NONE

VISION	MISSION	CORE VALUES
To be recognized as the #1 local university of employable graduates.	*To provide a comprehensive education that enhances the lives of QCU students for nation building and as world citizens.*	**J**ointness of undertaking and **O**rganizational adaptability with **Y**oke of Efficiency and Effectiveness
INSTITUTIONAL OUTCOMES	**PROGRAM OUTCOMES**	**COURSE OUTCOMES**
QCU graduates are: **Q**ualified in their chosen field locally and globally **C**ompetent and effective communicators **U**nique in demonstrating their sense of genuine nationalism and patriotism	Common to all Programs The graduates of BSIT have the ability to a.) Articulate and discuss the latest developments in the specific field of practice; b.) Effectively communicate orally and in writing using both English and Filipino c.) Work effectively and independently in multi-disciplinary and multi-cultural teams d.) Act in recognition of professional, social, and ethical responsibility e.) Preserve and promote "Filipino historical and cultural heritage" Common to the discipline The graduates of BSIT must have the ability to a.) Analyze complex problems, and identify and define the computing requirements needed to design an appropriate solution b.) Apply computing and other knowledge domains to address real word problems c.) Design and develop computing solutions using a system-level perspective d.) Utilize modern computing tools	*At the end of the course, the student should be able to:* LO1. Analyze different user population with regard to their abilities and characteristics for using both software and hardware products. LO2. Evaluate the design of existing user interfaces based on the cognitive models of target users. LO3. Understand the concepts of user differences, user experience and collaboration as well as how to design contextually.

WEEK NO.	LEARNING OUTCOMES	TOPIC
1	• Explain the QCU Vision and Mission; • Adhere to class rules and regulations; and • Understand the course requirements.	**Course Orientation and Course Introduction** • QCU Mission • QCU Vision • Course Overview • Grading System • Class Rules and Regulations • Course Requirements
2	• Define the overview and meaning of HCI • Enumerate the scope, goals and the benefits of learning HCI. • Understand the relevance of HCI and why it is important • Explain the design rules for HCI • Elaborate its principles and guidelines.	**HCI Overview** • What is HCI? • HCI Goals • Benefits of HCI • Relevance of HCI • Principles of HCI • Design Principles for HCI
3	• Understand and explain the software life cycle and usability engineering • Recognize the different concepts on iterative design and prototyping;	**HCI in the Software Process** • The software life cycle • Usability engineering • Iterative design and prototyping
4	• Explain the scope of User-Centered Design • Understand the Conceptual, Mental Models and Metaphors used in design for User's Capabilities	**User-Centered Design** • Users • Mental and Conceptual models • Interface Metaphors • Usability Goals • User experience goals
5-6	• Conceptualize the different Approaches in HCI Design • Define each HCI Designs and determine when to use these approaches.	**HCI Design Approaches** • Anthropomorphic Approach • Cognitive Approach • Empirical Approach • Predictive Modeling Approach
7-8	• Explain the User Interface • Differentiate the types of User interfaces and its uses.	**The User Interface** • Efficiency of a Use Interface • Types of User Interface • Graphical User Interface • Voice User Interface • Multi-Modal User Interface • Other User Interface • User Interface Principles
9	MIDTERM EXAMINATION	

10-11	• Understand the different types of prototyping,purpose and characteristics of each. • Design an interface using prototyping softwares.	**Prototyping Tool** • Types of Prototype • Prototyping Software
12-13	• Describe the use of Computer System • Familiarize the Interface Architecture in HCI	**Computer System and Interface Architecture** • Input and Output Devices • Dialogue Techniques • Computer Graphics • Dialogue Architecture
14	• Define the different processes in the development phase of a project • Distinguish the ISO usability standard 9241	**HCI Project Development** • Introduction to projects • Prototyping • Contextual inquiry • Usability engineering
15-16	• Differentiate each method used in evaluation phase of a project • Internalize the 10 classifications of Heuristic	**Evaluation Methods** • Heuristics • Cognitive evaluation • Usability testing • Questionnaires • Research design
17	• Project Presentation in HCI	**Final Project Presentation**
18	FINAL EXAMINATION	

Prepared by :

Ms. Rose Anne A. Tanjente
Course Coordinator – HC101

Checked by:

Ms. Maria Aura C. Impang, LPT, MSIT
Program Chair, Information Technology Department

Approved by:

Ms. Lalaine Josefa L. Carrao, LPT, MSIT
Dean, College of Computer Studies
